

 **RESTORER**TM
MAKING OLD, NEW AGAIN

STRIP | SAND | TEXTURE | POLISH

- Sands wood
- Removes Rust
- Eliminates Left Over Paint
- Removes Wood Stain
- Auto Restoration and Metal Prep
- Reclaimed & salvage Wood
- Create Latest Styles in Furniture

Re-purposing Building Materials Has Never Been So Easy

The Restorer refinishes and repurposes wood, metal, concrete and fiberglass for new projects or to reinvigorate an old project.

TOOL-LESS ACCESSORY CHANGE

QUICKLY REMOVES DEBRIS

DEBRIS COLLECTED VIA A DUST PORT

Bring Projects Back To Life

Nothing is too used up to be restored again. Reinvigorate the rusty, beaten and dull with the Restorer. With this state-of-the-art tool, you'll be able to explore new possibilities with antique furniture, old metal and more.

More than a Sander

COMFORT = CONTROL

The Restorer provides much more than an average sander. It evenly distributes pressure across the tool, proving better control while reducing strain on wrists and hands.

VERSATILITY & EASE

With up to sixteen different accessories for countless applications, the tool is only limited by your current project and your imagination.

BREATHE LIFE INTO THE OLD

Solid wood or metal from yesteryear are sturdier and more reliable than their modern counterparts. Rediscover the possibilities in what was once old and tired.

A GREENER SOLUTION

Save money and the environment when you restore old materials rather than buying new and filling the landfill with items that have more heart and history than the store-bought alternative.

START KIT INCLUDES [WR351K1]:
